

Earn Your HAM Radio License

Amateur radio (also known as HAM radio) is the most reliable form of communication in disasters. Getting a license and knowing how to use amateur radio can be an important tool for you and your neighborhood when dealing with the impacts of a disaster.

It's easy to get your license. The Seattle Auxiliary Communications Service group is sponsoring a weekend class that will take you through the training program and give you the opportunity to take the license all in two days.

Upon completing the class, you will earn a "Technician" license. That's all you need to get on the air and use local repeaters, practice disaster communications, and participate in public service events. There's no Morse code requirement. The class will take you from the basics through to your successful completion of the exam.

The course will be taught by members of the Mike and Key Amateur Radio Club and members of the Seattle Auxiliary Communications Service.

Space is limited. Register early!

***Date:* September 23 & 24 (Both Saturday and Sunday)**

***Time:* 8am—4pm on Saturday & 8am—3pm on Sunday**
(License testing will be conducted in the same location at 3pm on Sunday.)

***Location:* South Seattle Community College,
Olympic Hall Room 202**

Fee: Material cost is \$35, which includes the newly published "ARRL Ham Radio License Manual" and the testing fee. If you just want to take the test, exam fee is \$14.

To register, or for further information, contact Hal Mueller (amateur radio call sign KE7BYN) at ke7byn@arrl.net (preferred) or by phone at 206-297-9574.
